Content:

- At the recruitment phase, the Department of Planning and Environment have a PD, which provides for focus capabilities.
- One of the many focus capabilities for an entry level planner is to be able to communicate effectively
- To operate at an intermediate level of this focus capability, the planner is required to show behaviour indicators of being able to prepare written material that is well structured and easy to follow
- Based upon this prescribed performance measure any of the team members who played any part in the development of the draft medium density housing code should be sacked immediately; and
- If this prescribed performance measure is adhered to by the officer and managed by their supervisor, why then do we have such a complicated, backward planning system with layers and layers of contradictory regulation?
