A person in a blue athletic outfit is walking a dark-colored dog on a leash along a paved path. The path is adjacent to a large body of water, likely a lake or reservoir. The sun is low on the horizon, creating a warm, golden glow and long shadows on the path. The sky is clear and blue. The overall scene is peaceful and scenic.

Canberra Market Data

Market Summary

Canberra

- Auction clearance rates increased in April, the only capital city to rise over the month. It is at its highest since 2024 for this time of the year. Auction volumes have more than halved to a 3-month low and are at their lowest since 2020 for this time of the year. The proportion of auctions withdrawn fell marginally to 13.0% but this is high compared to historical levels.
- **Houses:** DOM is at a 4-month low and for this time of the year, it is the lowest since 2022
Units: DOM increased marginally to its strongest since the record high in August 2020.
- **Houses:** Discounting decreased to a 5-month low but when comparing this time of the year only, it is at its highest since 2024.
Units: Discounting rose to its highest since 2008 and is at its highest on record for this time of the year.
- Distressed listings are stable for the third consecutive month.
- Canberra house prices rose 1.4% (\$14,848) in the March quarter to a record \$1.084 million – the first time prices have reached a new peak since mid-2022. This marks the fourth consecutive quarter of growth, the longest uninterrupted stretch since 2020–22.
- Canberra unit prices fell 2.9% (\$14,827) in the March quarter to \$489,304, marking the third consecutive quarterly decline.
- Canberra house rents held at a record \$700 per week over the March 2026 quarter, following a modest lift in the December quarter. Canberra unit rents also remained unchanged at a record \$580 per week over the quarter, after a stronger result at the end of 2025.
- Gross rental yields for houses in the ACT increased over the March quarter and decreasing annually (0.8% and -0.8% respectively). Unit yields experienced an increase both quarterly and annually (2.1% and 6.0% respectively).
- The vacancy rate increased to 1.1%, a 3-month high but the weakest April outcome since 2022.

Distressed listings are stable for the third consecutive month.

The proportion of ACT sale listings that are considered to be urgent/distressed, expressed as a percentage of total listings (L5Y)

House and Unit Prices

Canberra house prices rose 1.4% (\$14,848) in the March quarter to a record \$1.084 million – the first time prices have reached a new peak since mid-2022. This marks the fourth consecutive quarter of growth, the longest uninterrupted stretch since 2020–22.

Canberra unit prices fell 2.9% (\$14,827) in the March quarter to \$489,304, marking the third consecutive quarterly decline.

Quarterly Stratified median house and unit prices (Since 2000)

Houses	\$1,083,769	1.4%	Price Gap 121.49%
Units	\$489,304	-2.9%	

Rental Prices

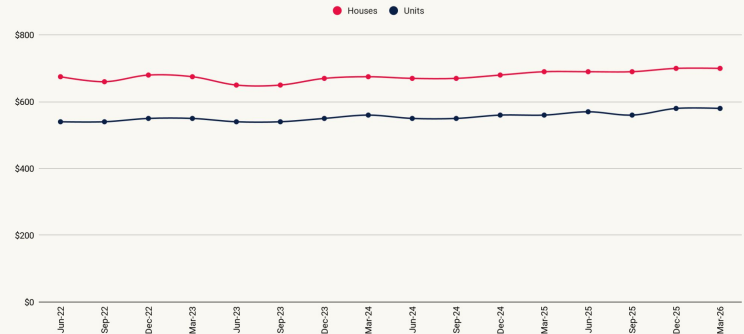

Canberra house rents held at a record \$700 per week over the March 2026 quarter, following a modest lift in the December quarter. The lack of further growth suggests the earlier increase has not translated into sustained momentum, with rental conditions remaining subdued despite signs of tightening supply.

Canberra unit rents also remained unchanged at a record \$580 per week over the quarter, after a stronger result at the end of 2025. While units had led a modest rebound, the flat outcome indicates that momentum has eased, with recent gains yet to carry through into early 2026.

Auction: Domain Market Insights Report, Auctions, April 2026. The Domain auction clearance rate is the percentage of properties successfully sold prior to, or at, an auction. The clearance rate is calculated by dividing auction sales by the number of reported auctions, including those withdrawn or postponed. Geographies are ABS GCCSA.

Days on Market: Domain Market Insights Report April 2026. Private Treaty Sales Only, based on GCCSA, Rolling 3-months aggregation of data, at least 50 private treaty transactions

Vacancy Rate: Domain Market Insights Report, Vacancy Rate, April 2026. The Domain Vacancy Rate is a percentage that indicates the proportion of estimated rental stock that is vacant over a month. This is derived by dividing the number of estimated vacant rental properties by the total number of estimated rental properties. An estimate of the rental stock across the geographical areas has been derived from census data and a forecast calculated to bring volume to current levels to provide an estimate of current rental stock. A vacant rental property is defined as a property on the market for longer than 21 days. Domain's vacancy rate time series began in 2017. Regional NSW

March 2026 House Price Report

Regional NSW house prices have increased over the March quarter, by \$25,010 or 3.1%, likewise, they remain increased year-on-year, up \$80,000.

The median house price now stands at \$845,000.

Regional NSW unit prices also increased over the quarter and annually, up 1.5% and 10.1% respectively.

The median unit price for units now stands at \$680,000.

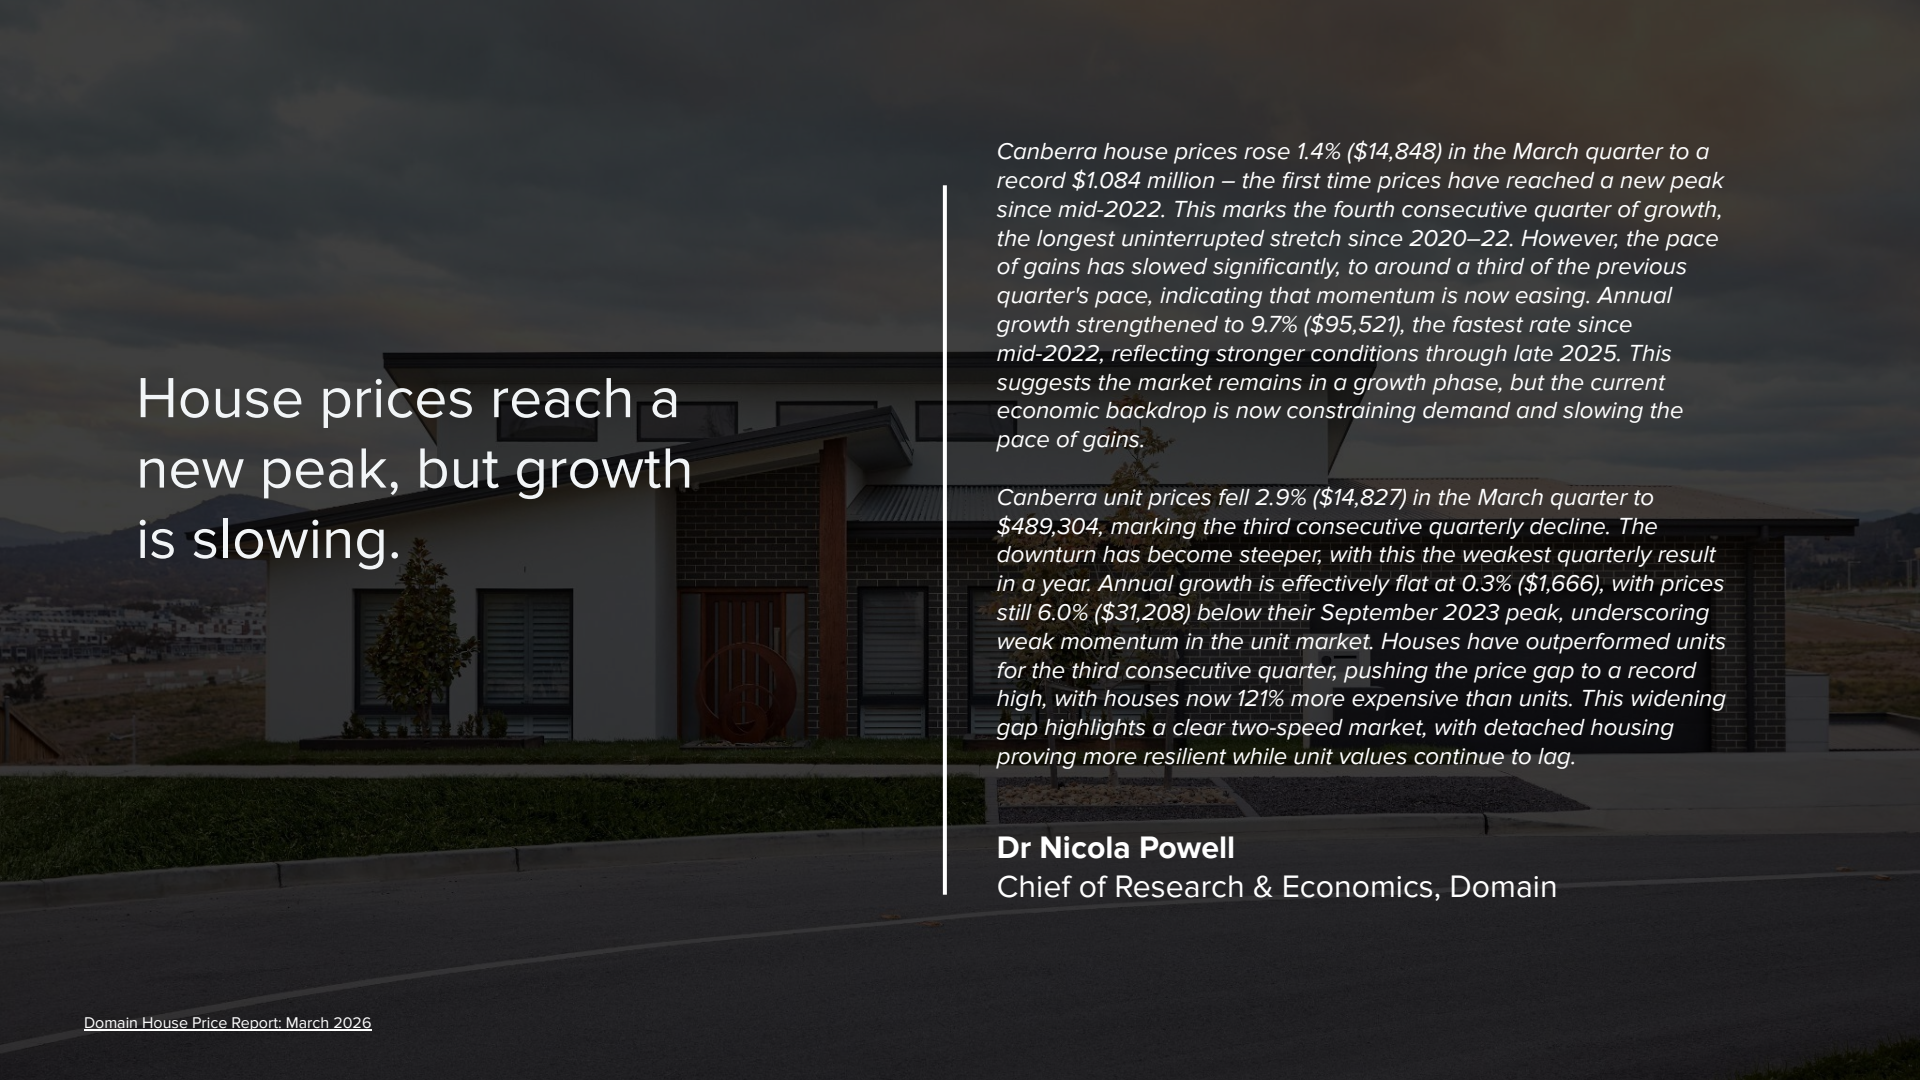

Quarterly Stratified median house and unit prices (L9Y) | Regional NSW

Domain House Price Report

March 2026

House prices reach a new peak, but growth is slowing.

Canberra house prices rose 1.4% (\$14,848) in the March quarter to a record \$1.084 million – the first time prices have reached a new peak since mid-2022. This marks the fourth consecutive quarter of growth, the longest uninterrupted stretch since 2020–22. However, the pace of gains has slowed significantly, to around a third of the previous quarter's pace, indicating that momentum is now easing. Annual growth strengthened to 9.7% (\$95,521), the fastest rate since mid-2022, reflecting stronger conditions through late 2025. This suggests the market remains in a growth phase, but the current economic backdrop is now constraining demand and slowing the pace of gains.

Canberra unit prices fell 2.9% (\$14,827) in the March quarter to \$489,304, marking the third consecutive quarterly decline. The downturn has become steeper, with this the weakest quarterly result in a year. Annual growth is effectively flat at 0.3% (\$1,666), with prices still 6.0% (\$31,208) below their September 2023 peak, underscoring weak momentum in the unit market. Houses have outperformed units for the third consecutive quarter, pushing the price gap to a record high, with houses now 121% more expensive than units. This widening gap highlights a clear two-speed market, with detached housing proving more resilient while unit values continue to lag.

Dr Nicola Powell

March 2026

Canberra conditions are tightening, but rent growth hasn't followed

Canberra house rents held at a record \$700 per week over the March 2026 quarter, following a modest lift in the December quarter. The lack of further growth suggests the earlier increase has not translated into sustained momentum, with rental conditions remaining subdued despite signs of tightening supply.

Canberra unit rents also remained unchanged at a record \$580 per week over the quarter, after a stronger result at the end of 2025. While units had led a modest rebound, the flat outcome indicates that momentum has eased, with recent gains yet to carry through into early 2026.

Canberra's vacancy rate tightened sharply to 0.8% in March, down from 1.5% in December, marking the lowest level since June 2022. Despite this significant reduction in available rental stock, rents have remained flat, highlighting a lag between tightening supply and rental growth, with affordability likely limiting the pass-through to rents.

Dr Nicola Powell
Chief of Research & Economics, Domain

Domain First Home Buyers Report

February 2026

Time to save

Domain First-Home Buyer Report | February 2026

Entry-level prices sit at the centre of the first-home buyer experience. They directly influence the size of the deposit required, the duration of saving, and the scale of the mortgage taken on at purchase.

All capital cities recorded annual growth in entry-level house prices, though the magnitude of growth varied substantially. Perth, Darwin, Brisbane and Adelaide recorded the strongest annual increases, each exceeding 20%. Sydney also recorded strong double-digit growth and remains the only capital city where an entry-priced house exceeds \$1 million. Melbourne and Canberra experienced more moderate increases, allowing income growth to partially offset rising prices.

Entry-level unit prices increased across all capital cities except Canberra, where prices declined over the year. Price growth remained relatively modest in Melbourne, Sydney and Hobart, but accelerated sharply in Perth, Brisbane, Darwin and Adelaide.

How much is an entry-priced home?

Area	Entry houses			Entry units		
	Entry price	Annual change	5-year change	Entry price	Annual change	5-year change
Sydney	\$1,150,000	15.0% (\$150,000)	64.3% (\$450,000)	\$645,000	4.0% (\$25,000)	9.7% (\$57,000)
Melbourne	\$720,000	6.7% (\$45,000)	20.0% (\$120,000)	\$441,250	1.3% (\$5,875)	-2.4% (-\$10,750)
Brisbane	\$856,000	20.6% (\$146,000)	106.3% (\$441,000)	\$660,000	24.0% (\$127,875)	80.8% (\$295,000)
Adelaide	\$720,000	20.0% (\$120,000)	159.2% (\$442,250)	\$508,000	12.9% (\$58,000)	84.7% (\$233,000)
Perth	\$780,000	22.1% (\$141,000)	105.8% (\$401,000)	\$550,000	25.0% (\$110,000)	83.9% (\$251,000)
Hobart	\$623,894	5.7% (\$33,894)	38.6% (\$173,894)	\$470,000	4.4% (\$20,000)	34.1% (\$119,500)
Darwin	\$565,000	21.5% (\$100,000)	61.4% (\$215,000)	\$355,000	21.4% (\$62,625)	42.0% (\$105,000)
Canberra	\$780,000	4.0% (\$30,000)	47.7% (\$251,876)	\$420,472	-3.5% (-\$15,278)	12.1% (\$45,472)
Australia	\$685,000	12.3% (\$75,000)	67.9% (\$277,000)	\$515,099	7.3% (\$35,099)	30.4% (\$120,099)

Time to save

Domain First-Home Buyer Report | February 2026

The time required to save a 20% deposit varies significantly across Australia, reflecting differences in both entry-level prices and income growth. Sydney continues to record the longest saving time for entry-priced houses. However, affordability pressures are no longer confined to Sydney.

Brisbane has the second-longest saving time for houses, followed by Adelaide and Perth – both for the first time on record – as rapid entry-level price growth in these markets has outpaced wage gains. This shift means Adelaide and Perth now have longer saving times than Melbourne, Canberra and Hobart, marking a significant change in the national affordability rankings.

For entry-priced units, the reshuffle is even more pronounced. Brisbane has now recorded the longest saving time for the first time, overtaking Sydney, while Adelaide has moved into third place, overtaking Hobart. Hobart and Perth share fourth place, with Perth overtaking Melbourne.

These shifts reflect accelerating price growth at the lower end of the market, particularly in Brisbane, Adelaide and Perth, rather than changes in interest rates or wages alone. In contrast, Melbourne and Sydney have recorded the most subdued unit price growth, while Canberra's higher average wages, combined with a decline in entry-level unit prices, have helped first-home buyers better manage entry-level costs.

Canberra's outcomes illustrate the growing importance of income. Weak house price growth, declining unit prices and the highest average wages have resulted in comparatively shorter saving timelines, despite high absolute price levels.

The time to save for a 20% deposit on an entry-priced home for a couple aged 25-34.

Mortgage serviceability

Domain First-Home Buyer Report | February 2026

Mortgage serviceability remains stretched

Mortgage serviceability varies widely by location, highlighting the critical role geography plays in first-home buyer affordability.

All capital cities now sit above the mortgage stress threshold for entry-priced houses. Darwin records the lightest mortgage burden, with house repayments accounting for 31.2% of income, though this still exceeds the recommended benchmark. It is followed by Hobart (39.3%), Canberra (40.2%) and Melbourne (41.4%) – the only capitals to record an annual improvement in serviceability.

At the other end of the spectrum, Sydney imposes the heaviest repayment burden, with entry-priced house repayments consuming 61.8% of household income. Brisbane follows at 50%, with Adelaide at 44% and Perth at 42%. These outcomes reflect a combination of elevated prices and higher borrowing requirements, leaving first-home buyers exposed even after recent rate relief.

Mortgage serviceability outcomes are more favourable for entry-priced units, though the picture varies markedly by city. In Darwin, Canberra, Melbourne, Hobart and Perth, unit repayments remain below the 30% threshold, ranging from 19.6% in Darwin to 29.6% in Perth and Hobart.

However, Sydney (34.7%), Brisbane (38.6%) and Adelaide (31.0%) are in mortgage stress for entry-priced units. This shift signals that unit markets in some capitals are no longer reliably shielding first-home buyers from repayment pressure, particularly where unit prices have risen rapidly.

Mortgage repayments on an entry-priced home as a percentage of income for a couple aged 25-34
