

CHARGE HUB CHARGING SOLUTION

CHARGING MADE EASY.

A NEW ERA OF
DRIVING IS HERE.

And MG Motor is at the forefront of the accessible electric revolution.

From the award-winning ZS EV – to the quiet and clever HS Plus EV range, MG's electric journey has already begun.

But MG isn't just about the EV.

The MG CHARGE HUB is at the heart of the paradigm shift to EV hotspot charging that will help to bring electric motoring to everyone.

TETHERED 5 METRE TYPE 2 CABLE COMES AS STANDARD

MG CHARGE HUB: FOR EVERY HOME AND BUSINESS

Available in two capacities, the MG CHARGE HUB offers Type 2 charging capability for any suitable electric vehicle on the market in Australia.

Its low-profile form factor is designed not only to be compact, it's stylish, elegant look complements even the most modern Australian garage or building façade.

Its distinct RGB LED surrounds the discreet Type-2 plug cradle, while the CHARGE HUBs integrated five-metre-long cable and Type-2 plug ensures maximum charging flexibility.

MG CHARGE HUB: ALWAYS CONNECTED

The MG CHARGE HUB comes fully connected and ready to perform when you need it, with connectivity via 4G, Ethernet or wi-fi.

Keep your charging network safe with the integrated RFID card system, guaranteeing security for multiple users. Simply tap and go; it's that easy with the MG CHARGE HUB.

MG CHARGE HUB: SEAMLESS FLEXIBLE CHARGING

The MG CHARGE HUBs Open Charge Point Protocol (OCPP) guarantees a seamless charging experience, load balancing options and monetised charging* for all users, now and later.

What's more, the weather-resistant CHARGE HUB can be installed inside or outside under suitable cover for maximum flexibility.

*Additional software required for monetised charging.

MG CHARGE HUB: EVERYWHERE, ANYTIME

MG CHARGE HUBs are being installed at hospitality venues around the country, as MG Motor continues to expand its infrastructure roll-out support program focused on hotels and accommodation providers.

No matter which EV you own, the CHARGE HUB offers style, convenience and rapid charging in the palm of your hand. It's the perfect complement to a new age of low-impact motoring.

MG CHARGE HUB: FASTER CHARGING

Adding a CHARGE HUB is a smarter, safer and more secure way to regulate the way EV recharges occur at your home or business. Once the CHARGE HUB is installed, fast charging will be available at your fingertips whilst using the same amount of electricity as the significantly slower emergency wall charger.

CHARGE TIMES

The CHARGE HUB 7kW can reduce charging times on a typical EV battery from zero to 80% by two-thirds*, while the CHARGE HUB 11kW – suited for locations with access to a three-phase electrical circuit – is faster again.**

*When compared to 2.4kW emergency charging cable supply with MG ZE EV. Charge speeds from 80 to 100% are slowed to prolong battery life.

**When used in conjunction with a three-phase charging compatible vehicle.

MG CHARGE HUB: STYLE AND SUBSTANCE

Even though the CHARGE HUB is a state of the art charging device, it doesn't forgo beauty. Its stylised form complements both modern and classic architecture, while its small form factor allows it to be mounted in the most convenient space.

FOR ALL EVS

The CHARGE HUB is compatible with all Type-2 port equipped EVs, meaning that it is not only perfectly suited to the full range of MG Electric Vehicles, but most EVs on the market. This means that once you install the MG CHARGE HUB, your charging needs will be satisfied for years to come.

ELECTRIC FOR EVERYONE

From the value-driven ZS EV to the latest MG4, MG's commitment to the EV space is unparalleled – and this commitment extends to charging.

The MG CHARGE HUB is, and always will be, able to recharge any suitably equipped electric vehicle in the Australian market that's equipped with a Type-2 plug.

This brand-agnostic approach shows that MG is all about Electric For Everyone.

INSTALLATION

Installation made easy. The MG CHARGE HUB can simply be installed by any licensed electrician. Speak with your dealer today for a list of their preferred installers.

MG CHARGE HUB: SAFETY FIRST

The MG CHARGE HUB is certified to the most stringent Australian standards for complete peace of mind. Sophisticated anti-tamper electronics and a prominent shut-down button, offer further security and safety for all users.
