GARMEN PENOPTICS – FORWARD VIEW SET UP

KEY

Prior to starting I did a "**Restore Sonar Defaults**" on my Garmin as per the Installation page below.

The fields with a yellow background have the same name as the screens that make up the Garmin perspective mode set up. On your Garmin devise click on >> to open the linked pages.

The fields shown in red fonts are the changes I made to the factory settings.
The other fields still in black are as per the factory settings.

Live Scope Forward Menu						
Gain		< 8 meters = 90% > 8 Meters 60-70%				
Depth Range		20m				
Forward Range		5m				
Pause Sonar						
Transmit		On				
Sonar Setup >>	Sonar Setup		Appearance >>	Sonar Appearance		
				Color scheme	I like Black emerald or Amber	
				Color gain	61%	
				Color limit	64%	
				Trails	Off	
				Bottom Fill	On	
			Layout >>	Sonar Layout		
				Grid overlay	Show	
				Scroll History	Hide	
			Noise Reject	High	On screen Control	Show
			TVG	Off	Reverse Range	Default
			Ghost Reject	Off	Compass Range	Off
			Overlay data >>	Sonar Overlay	Off	
				Device Voltage	Show	
				Depth	Show	
				Speed	Show
