

Video transcript

The ACT Government is committed to delivering better healthcare where and when Canberrans need it. We are investing in new and improved health care infrastructure right across the territory.

Sitting at the heart of our plans for our healthcare system is the SPIRE Project, the new state-of-the-art emergency, surgical, and critical health care facility at Canberra Hospital. With more operating rooms, emergency, treatment spaces, and intensive care beds, the SPIRE Project will deliver a bigger, better Canberra Hospital.

To be built at the heart of the existing campus, the SPIRE Project will transform our region's major tertiary hospital, setting it up for the next decade and beyond. Health professionals and the Canberra community will inform the design and construction of the new facility with an anticipated completion in 2024.

The SPIRE project is one of the largest healthcare infrastructure projects ever undertaken in the ACT and is key to ensuring we continue to meet the healthcare needs of Canberra's growing and ageing population into the future.
