The Woodville Road Streetscape Upgrade will:

- Improve economic opportunities for traders via increased visitor numbers
- Enhance current vehicle movement along Woodville Road by maintaining two lanes of traffic in each direction and introducing sheltered right turn to side streets
- Attract private investment to under-utilised Council and private land holdings
- Provide activated places and facilities to attract visitors
- Create a more aesthetic streetscape environment
- Encourage increased use of Civic facilities e.g. Library, Civic Centre
- Improve pedestrian movement and linkages
- Enhance and promote the use of public transport (bus and rail)
- Enhance cycling connection from the Outer Harbor Greenway to the precinct
- Increase greenery within the precinct
- Improve public safety and encourage activity in the evenings
- Enhance existing historic architecture

“To establish the Woodville Road Precinct as the Civic & Retail Heart of Woodville.”

Outerspace Landscape Architects / Woodville Road Streetscape Upgrade Concept_DRAFT REPORT / Pg 6
We are looking to develop the land at 67-85 Woodville Road, adjacent the Woodville Railway Station. As a result, there are plans to relocate all day parking to a new sealed carpark 120 metres north of the train line between the St Clair Recreation Centre and the station.
