4:30 PM	BEYOND THE SAFE CITY SOCIAL INNOVATION FORUM CLOSES

ABOUT THE PROGRAM

The Beyond the Safe City Social Innovation Forum program is designed to give participants the opportunity to connect, learn, exchange useful information and provide a space for conversations that matter. The format incorporates innovative methodologies including World Café and Open Space with an opening keynote presentation and 10 Lightning Talks over the two days.

WORLD CAFÉ is a simple and effective methodology for hosting large group dialogue. Throughout the two days you'll participate in up to four 30-45 minute round table conversations with 4 or 5 fellow participants diving into key issues and opportunities, as well as any themes that emerge over the two days. Learn more about the World Café methodology [here](#).

OPEN SPACE SESSIONS are proposed and led by participants. Over the two days there will be six rounds of Open Space, with six 45 minute sessions being run in each time slot – a total of 36 sessions. Each day we'll open up a 'marketplace' for participants to propose a topic and the type of session they would like to lead – it might be a presentation, conversation, workshop or planning discussion. Once the timetable is up you are then free to choose which session you'd like to participate in. Come prepared to be surprised, amazed, challenged and inspired. Read more about Open Space Technologies [here](#).

LIGHTNING TALKS are five minute talks intended to inspire new ideas, catalyse conversation, spark insights and ignite action. Over the two days we'll have two rounds of Lightning Talks where you'll get to hear from thought leaders, practitioners and pioneers, about how we might make Melbourne a city where all feel safe, welcome and connected, and a place where all can thrive.

*Program subject to change without notice.
