

# GREAT STREETS

# MAKE GREAT CITIES

17 February 2016

Dear Sir/Madam

**WILLIAM STREET, BETWEEN LITTLE COLLINS AND COLLINS STREETS,  
MELBOURNE  
Streetscape improvement works**

The City of Melbourne is proposing works to improve the environment in the above section of William Street. We welcome your feedback on the enclosed concept plan.

The City of Melbourne is upgrading many of its streets as part of the Streetscape Improvements Program, which aims to enhance our streets and laneways through road and footpath works, landscaping and other improvements.

**The proposal**

The proposed streetscaping will improve this section of William Street for residents, businesses and visitors by:

- upgrading asphalt footpaths to sawn bluestone paving
- installing new stainless steel rubbish and recycling bins
- upgrading existing access ramp with tactile ground surface indicators to facilitate access for people with a sight impairment
- upgrading existing tree plots with bluestone edging and porous pavement.

**The cost and timing**

The \$300,000 project is planned to commence in early April 2016 and will take approximately four weeks to complete.

Closer to the start of construction, properties along this section of William Street will receive information confirming the start date and timing of the works from our contractor Citywide.

**Questions**

Should you have any comments or questions about the proposed works, please call the Engineering Services Branch on 9658 8711 or email [streetscapes@melbourne.vic.gov.au](mailto:streetscapes@melbourne.vic.gov.au)

Yours sincerely

**Michael Norton**  
Principal Engineer Infrastructure
