**QVM CLEANING AND WASTE MANAGEMENT -  
CURRENT STATE OCTOBER 2018**

| WASTE   | 2017-18                               | OPERATIONS   |
|---|---------------------------------------|--|
| <b>630M<sup>2</sup></b><br>of space currently used for on-site waste management               | <b>4,981 TONNES</b><br>of total waste | There is no centralised waste transfer area or recycling station. This results in considerable resources being spent on collecting and disposing of waste generated by market operations, including fish and meat offal, organics and packaging such as cardboard and polystyrene. |
| <b>5,000 TONNES</b><br>of waste generated per year  | <b>2,209 TONNES</b><br>of landfill    | Centrally located, fit for purpose waste management and recycling facilities would support more efficient business operations and improved sustainability.   |
| <b>\$4.4 MILLION</b><br>a year on cleaning, with removal of waste one of largest contributors | <b>2,772 TONNES</b><br>of recycling   | Future requirements for waste management are estimated to be 972m <sup>2</sup> .   |
| <b>\$1 MILLION</b><br>spent on waste removal per year   |                                       |  |
| <b>71% OR \$1.8 MILLION</b><br>increase in cleaning costs over the past 10 years              |                                       |  |
