

Design a new truck!

Design a new truck to help teach everyone to Avoid, Reduce and Reuse, or to recycle correctly.

Our items are made from materials from the earth. Paper is made from trees, glass from sand, plastic is made from oil and metals are dug from the earth in rocks.

Buying less products helps save these materials for the future.

Recycling helps us to reuse the materials from the earth again. For example, paper can be turned into toilet paper so forests don't need to be cut down just to make toilet paper!
What a waste!
