

# M40 Preston Reservoir to Merri Creek Water Main Renewal Project

## Construction Update – Northern section

April – June 2018

### KEY ACTIVITIES

- Upgrade existing shared path from Crawley Street to the tennis courts in GE Robinson Park (near the water fountain), including a raised crossover at Crawley Street
- Install a power cable and communications conduit from the intersection of Powell Street and Robinson Road through GE Robinson Park to Reservoir 1
- Reinstate the open space west of GE Robinson Park, north of Crawley Street.

### Shared path upgrade to improve safety

From mid-April, the project team will commence works on upgrading the shared path within GE Robinson Park, from Crawley Street to the tennis courts. At the Crawley Street intersection, the path will be raised to link to the existing path along Robinson Road. These safety upgrade works are being undertaken in collaboration with Darebin City Council.

Construction of the raised path across the intersection of Crawley Street and Robinson Road will be completed in two stages to ensure vehicle access through to Down Street. There may be a short delay when we asphalt and line mark the road. Please allow extra time when travelling around these works.

Access for pedestrians and cyclists in and out of GE Robinson Park at Crawley Street will be maintained. As there will be localised detours, please look out for signage to navigate safely around our works.

The following graphic shows the location and staging of the shared path works.

## Installing conduit

These works will involve excavating a shallow trench so we can install a power cable and conduit from Powell Street to connect Melbourne Water's communications network. This work will be completed in conjunction with the shared path upgrade to minimise disruption.

## Reinstatement

Once we have completed these works the project team will resurface and hydro seed the open space west of GE Robinson Park. The grass will need some time to establish and grow.

## Construction hours

These works will be performed during the day between **7am to 6pm Monday to Saturday**.

Thanks for your patience as we complete this work - the last of our pipeline construction activities and reinstatement. We expect all our work to be completed by the end of June 2018.
