

# M40 Preston Reservoir to Merri Creek Water Main Renewal Project

## Construction Update – Southern section April – June 2018

We are back onsite and will be commencing the tree planting and final reinstatement work along St Georges Road from mid-April 2018.

We expect all our reinstatement work to be completed by June 2018.

### KEY ACTIVITIES

- Planting understory and Chinese elms
- Hydro seeding
- Site clean-up

### Understory planting

Throughout April and May the project team will complete the final understory planting along St Georges Road.

### Planting Chinese elms

From mid-May the project team will complete the planting of all Chinese elms along St Georges Road.

We will complete the section from Hutton Street to Miller Street on the eastern side of St Georges Road. Then, we will work down the western side, from Miller Street to Arthurton Street.

All trees will continue to be assessed by our arborist. Those that didn't survive the relocation late last year will be replaced. We will continue to monitor tree growth over the next two years.

### Hydro seeding and site clean up

Once all tree and understory plantings have been completed, the project team will hydro seed to promote grass growth. We plan to do a final site cleanup in June 2018.

### Construction hours

These works will be performed during the day between **7am to 6pm Monday to Saturday**.

**Thanks for your patience as we complete this reinstatement work.**
