

M41 Merri Creek to MCG Water Main Renewal Project

Construction update August 2018

Construction of the M41 Merri Creek to MCG Water main Renewal Project has commenced on George Street from Gertrude Street and is progressively moving south towards Victoria Parade.

Project Site Location

This update specifies that George Street, from Gertrude Street to 28 George Street, will now be closed to vehicles for a period of time whilst works are undertaken from **Friday 3 August 2018**. For your safety, our construction corridor will be fenced off for entire road width with the footpath open at all times.

The road will be closed to all vehicles on **George Street from Gertrude Street to 28 George Street, Fitzroy**. The entry and exit to the construction corridor will be from Gertrude Street and Victoria Parade, Fitzroy. These entry and exit locations will be managed by traffic controllers during construction hours.

Upcoming work locations

Installation of the new water main

The project will undertake preliminary activities which includes, service proving using a vacuum truck, road sawing, once the site zone has been established, skip bins and large excavators will be mobilised to commence pipe laying.

The project will be excavating to expose the existing water main whereby they remove the existing pipe and relay a new pipe in the same location. This is done through the use of a large excavator. The trench is approximately 3m deep and 20m long to install the new 1.2m diameter steel pipe. These pipes range in lengths from 6.5m to 13.5m.

You will notice a crew of up to ten workers, as well as large excavators, compaction rollers, trucks and light construction vehicles within the work zone.

Temporary changes to on-street parking, off-street parking and vehicle access to driveways

There will be no on-street parking and no vehicle access available within the work zone while the works are undertaken. This includes **temporary loss of vehicle access to driveways and off-street car parks from George Street.**

These temporary changes may be in place for a period of up to 4 weeks, weather permitting. The project will reopen up the road as soon as it is safe to do so.

Please also keep in mind that as a result of these temporary road closures, there will be limited on-street parking available in neighbouring streets for both local residents and businesses.

Traffic detours

There will be local traffic management and detours in place during working hours. Our traffic controllers will be on duty at each work location to ensure traffic and pedestrians can navigate around our worksite safely during construction hours. Please follow the signage and direction of our traffic controllers and allow extra travel time.

Reinstatement

Once we have completed laying pipe and upgrading the water main the project will temporarily reinstate the trench with asphalt so the road can open for traffic. The project will ultimately re-asphalt roads kerb to kerb at a later stage. We will keep you informed on when these works will need to occur.

What can you expect

- Site establishment with temporary fencing erected to delineate the work zone
- Temporary loss of vehicle access to driveways and off-street car parking on George Street
- Temporary changes to on-street parking and traffic conditions
- Temporary lane and road closures
- Temporary changes to the speed limits near work areas
- Tree trimming on George Street
- Noise from various construction plant, vehicle and activities such as rock breaking
- Dust and vibration
- Increased construction vehicle movement in local area

Construction hours

These works will be performed during the day between **7am to 6pm Monday to Friday** and **Saturdays between 7am to 1pm**.
