

Parking Permits - types and definitions

To simplify Parking Permit options and reduce misuse of permits, we're proposing some changes to the types of Parking Permits currently available.

WHAT WE ASKED

Question 1

Do you hold a Visitor Parking Permit?
What do you mainly use the Visitor Parking Permit for?
How often do you use your Visitor Parking Permit?

Question 2

How often would you say your household uses its Foreshore Parking Permits? How long were the car parked at the foreshore last time this permit was used?

WHAT YOU TOLD US

65%
of residents

told us the most common main use for their Visitor Parking Permits was for family or friends visiting.

23%
of residents

told us they most commonly used their Foreshore Parking Permits once a week.

WHAT WE PROPOSE

- 1 Introduce single-use, short-term, visitor and foreshore parking vouchers.
- 2 Redefine and streamline Combined, Temporary and Miscellaneous Parking Permit types.

EXPECTED OUTCOMES

- 1 Introduce a more flexible and cost-effective system, allowing eligible residents to only pay for the visitor and foreshore parking vouchers they need.
- 2 Prioritise recreational visitor use in high value areas.
- 3 Minimise unintended misuse of permits.

PROPOSED TIMELINE*

New applicants
1 July 2021

Existing permit holders
1 July 2025
