

Do you believe the proposed regulations will encourage investment in the onshore conventional petroleum sector in Victoria?

Yes

If not, what would you like to see improved?

-

Do you believe the proposed regulations adequately support community engagement and consultation?

No

If not, what would you like to see improved?

Gas is a fuel that is old hat - its use should be MINIMAL only used where no viable option exists , the potential damage via global warming + destruction of areas to extract it is disgusting - it is done in a bully boy fashion by greedy huge companys with NO interest in anyone anything but their greedy profits

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to notice/submissions as part of application process for authorities (e.g. retention and production titles)?

-

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to notice/submissions as part of Operation Plan?

-

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to requirements for community engagement during the life of exploration, retention and production titles (as required in the title application)?

-

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to requirements to describe community engagement during operations (as required in the Operation Plan)?

-

Do you have any suggested improvements to the proposed regulations?

Yes

If yes what are your suggested improvements to the proposed regulations?

Phase out or minimize gas use

Do you believe the proposed regulations ensure that social, economic and environmental factors are adequately considered in decision-making for grant of Exploration, Retention and Production Titles?

No

If not, what would you like to see improved?

More power to people to say no

Do you believe that the proposed regulations ensure that social, economic and environmental factors are adequately considered in decision-making for Operation Plan approval/variation and authority surrender?

No

If not, what would you like to see improved?

The impacts of gas use as a global warming fuel should be factored in

Are the proposed operation plan requirements to manage risks and impacts likely to be effective specifically as they relate to environment management plans, well operation management plans, code of practice of well operations management and rehabilitation plans?

No

If not, what would you like to see improved?

Don't do it in the first place

Are the proposed information and reporting requirements likely to be effective specifically as they relate to progress against a work program?

No

If not, what would you like to see improved?

Free legal help to citizens to oppose gas extraction

Are the proposed information and reporting requirements likely to be effective specifically as they relate to rehabilitation undertaken and changes in liability?

No

If not, what would you like to see improved?

Big company's cannot be trusted so greater ability to make them do rehab works

Are the proposed information and reporting requirements likely to be effective specifically as they relate to results of monitoring undertaken?

No

If not, what would you like to see improved?

more tax on gas company's to pay for monitoring

Are the proposed information and reporting requirements likely to be effective specifically as they relate to community engagement undertaken?

No

If not, what would you like to see improved?

-

Are the proposed information and reporting requirements likely to be effective specifically as they relate to operational activities?

No

If not, what would you like to see improved?

-

Are the proposed information and reporting requirements likely to be effective specifically as they relate to incidents?

No

If not, what would you like to see improved?

-

Are the proposed information and reporting requirements likely to be effective specifically as they relate to geological data?

No

If not, what would you like to see improved?

-

Do you believe that the new regulations will provide a clear and effective administrative framework that facilitates petroleum development activities?

No

If not, what would you like to see improved?

-

Would you like to comment on any other aspects of the proposed regulations?

Yes

If yes, please describe

Stop trying to extract gas that will potentially do massive damage to the land/water/environment.
