

Do you believe the proposed regulations will encourage investment in the onshore conventional petroleum sector in Victoria?

Yes

If not, what would you like to see improved?

-

Do you believe the proposed regulations adequately support community engagement and consultation?

No

If not, what would you like to see improved?

We cannot dig up any new gas. We are in a climate emergency. The local people don't want it. Seismic testing is fatal to sea life. This CANNOT go ahead. Stop immediately!

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to notice/submissions as part of application process for authorities (e.g. retention and production titles)?

-

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to notice/submissions as part of Operation Plan?

-

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to requirements for community engagement during the life of exploration, retention and production titles (as required in the title application)?

-

What are your views on the proposed consultation requirements with the community and affected stakeholders in relation to requirements to describe community engagement during operations (as required in the Operation Plan)?

-

Do you have any suggested improvements to the proposed regulations?

Yes

If yes what are your suggested improvements to the proposed regulations?

Stop digging gas. It's insanity. We are in a climate emergency. The fossil fuel industry needs to be shut down immediately not expanded.

Do you believe the proposed regulations ensure that social, economic and environmental factors are adequately considered in decision-making for grant of Exploration, Retention and Production Titles?

Yes

If not, what would you like to see improved?

See above. For the enrichment of some corporations, you are putting my life, my children's life and their children's lives in danger. This is madness. It has to stop immediately.

Do you believe that the proposed regulations ensure that social, economic and environmental factors are adequately considered in decision-making for Operation Plan approval/variation and authority surrender?

No

If not, what would you like to see improved?

See above

Are the proposed operation plan requirements to manage risks and impacts likely to be effective specifically as they relate to environment management plans, well operation management plans, code of practice of well operations management and rehabilitation plans?

No

If not, what would you like to see improved?

See above

Are the proposed information and reporting requirements likely to be effective specifically as they relate to progress against a work program?

No

If not, what would you like to see improved?

We cannot do this AT ALL. There are no 'safeguards' that can stop the climate and ecological emergency other than an urgent shut down of the fossil fuel industry.

Are the proposed information and reporting requirements likely to be effective specifically as they relate to rehabilitation undertaken and changes in liability?

No

If not, what would you like to see improved?

You cant rehabilitate a dead planet. If we go over 2oC warming, which we will, there is no hope of coming back. Read the IPCC report.

Are the proposed information and reporting requirements likely to be effective specifically as they relate to results of monitoring undertaken?

No

If not, what would you like to see improved?

See above. No amount of 'monitoring' will make any difference. Stop this insanity

Are the proposed information and reporting requirements likely to be effective specifically as they relate to community engagement undertaken?

-

If not, what would you like to see improved?

-

Are the proposed information and reporting requirements likely to be effective specifically as they relate to operational activities?

-

If not, what would you like to see improved?

-

Are the proposed information and reporting requirements likely to be effective specifically as they relate to incidents?

-

If not, what would you like to see improved?

-

Are the proposed information and reporting requirements likely to be effective specifically as they relate to geological data?

-

If not, what would you like to see improved?

-

Do you believe that the new regulations will provide a clear and effective administrative framework that facilitates petroleum development activities?

-

If not, what would you like to see improved?

-

Would you like to comment on any other aspects of the proposed regulations?

-

If yes, please describe

-
