Comments: I oppose the construction of the mineral sands project planned for Glenaladale. We are residents of the Bairnsdale area, my husband and I grew up in this area and now are raising our children here. We love East Gippsland for the pristine environment that surrounds us. There seems no sense or logic in building a mine in the middle of the Lindenow food bowl. The potential negative effects including issues with our water supply, air quality & increased air pollution from transportation is extremely concerning. It will be extremely disappointing if this goes ahead in our local community because from what I understand there is no benefits.
