

WGTP - List of information requests made by the City of Melbourne

(as at 22 August 2017)

The City of Melbourne has made a number of information requests outlined in Table 1 below. The City of Melbourne confirms that all of these requests are maintained, and at the date of this document, remain outstanding.

For assistance, enclosed with this document is a copy of the request that has been made for the peer review of the business case (outlined in item 2 of Table 1).

Additionally, the City of Melbourne would like to request the documents outlined in Table 2.

Table 1: Requests to date

Request	Date request made
1. Reference design as held in the possession of Deiter Lim	Wednesday, 16 August 2017 (during cross examination of Dieter Lim)
2. Peer Review of Business case	Wednesday, 16 August 2017
3. Model screenshots and model run-through videos	Friday, 18 August 2017
4. Authorship information regarding the Project Notes	Friday, 18 August 2017

Table 2: Additional requests

Request	Date request made
5. Minutes of the meeting between Tim Veitch (VLC), John Allard and William McDougall	Monday, 21 August 2017 (during cross examination of Tim Veitch)
6. Any reports, summaries or documents arising from the meeting outlined at item 5 above.	Monday, 21 August 2017 (during cross examination of Tim Veitch)

Subject: WGTP - City of Melbourne - Request to produce document - urgent

Dear Ms Everett

We are continuing to act for Melbourne City Council in relation to the West Gate Tunnel Project.

We refer to the following paragraph contained in EES Technical Report A Transport Part 2 at page 18 (section 4.4 "Modelling Scenarios") of Appendix F "West Gate Tunnel Transport Modelling Summary" (which is page 112 of the pdf document):

A 2011 model was originally used for the assessment to represent existing conditions as it was the closest modelled year in the VLC Zenith model to the current time period. In response to the peer reviewer's comments during the development of the Business Case, VLC agreed to construct an updated 2014 base model (including 2014 demographic, land use, road network and public transport network assumptions) for validation. In order to address comments from the peer reviewer, it also included model calibration improvements, including:

- *the balance between freeway and arterial roads*
- *West Gate Freeway travel times*
- *commercial vehicle trip generation rates for the Port of Melbourne*
- *commercial vehicle validation in the inner west*
- *commercial vehicle trip generation rates across the entire model.*

This 2014 model has been developed specifically for this project, which addresses the concerns of the peer reviewer.

We are writing to request that the Proponent provide us with:

- the identity of the peer reviewer; and
- any and all comments made by the peer reviewer referred to in this paragraph above, including a copy of any document containing the comments of the peer reviewer that are being referred to.

We are requesting your assistance to progress this with your client as a priority.

Thanks

Jane/Sophie
