Comments: Dear Planning Panels Victoria, I wish to support the submission presented by the Department of Environment, Land & Planning at Manningham City Council's Function Centre on 29th May, 2019. One part of the proposal was that the old Bulleen Drive In Site be reverted to bushland and native vegetation along the Yarra River. As well as supporting the proposal for the area up to Bulleen Road be designed for recreational open space to including a linking Yarra River walking and cycling track to Heide Museum and beyond. I live opposite the old Drive In site and locals are distressed at the potential loss of trees and vegetation which will occur with the NEL construction - so would hope that the area could be returned to bush and open space post construction. The cultural hub would also be supported but I have some concerns for the proposed amendments to allow a 17 metre high development at Yarra Valley Country Club. Thank you for the opportunity to comment. Sincerely Roxene Carroll
