Comments: As the business owner of Red Rooster in Greensborough, my main concern is the flow of traffic for customers and for staff completing home deliveries. If the flow of traffic greatly impacted my sales, the business may not survive. If road works and construction impact delivery times, this will affect the store's sales and the viability of the delivery service. A reduction in sales will in turn cause a reduction in the number of hours for staff, hence impacting on their livelihoods too. Entry to the store is currently not ideal nor is it customer friendly due to the delay at the traffic lights. Any further disruption or complication will deter customers even further from purchasing in store. I can not emphasise enough how significantly this will impact negatively on the business and my livelihood as a franchisee owner of a small business. Also once the project is completed, the store will have lost its visibility to passing drivers on the Greensborough Bypass. This will also have a negative impact on my business. Will there be any signage advertising Red Rooster given that it will not be visible to traffic as it currently is? I have worked hard to build the business and am highly concerned that the construction of this project will have a negative financial impact on my business and staff.
