ENVIRONMENTALISTS ARE REALLY JUST OUT TO REDUCE THE QUALITY OF OUR LIFESTYLE.

AND JUST WHEN WE'RE ABOUT TO GO TO WAR FOR IT.
TRANSPORT EMISIONS IN AUSTRALIA

Transport emissions by source:
- 85% Road
- 4% Rail
- 9% Air
- 2% Ship

Transport is the 3rd largest source of emissions.

18% of Australia’s greenhouse gas emissions in 2015.

Highest growing source of emissions since 1990: 51%.

Road transport = 85% of all transport emissions.

Cars = 46% of all transport emissions.

Melbourne 2014
SNAMUTS Composite Accessibility Index

- Excellent (20.0-31.5 points)
- Very Good (15.5-20.0 points)
- Good (12.0-15.5 points)
- Above Average (10.0-12.0 points)
- Average (167-200 points)
- Below Average (13.5-167 points)
- Poor (10.0-13.5 points)
- Minimal (4.0-10 points)
- Urbanised areas without minimum service

Average: 14.6
The 1969 Melbourne Transportation Plan, developed during the Bolte government, consisted of an extensive network of freeways across Melbourne. The plan also included new railway lines as well as the Underground Loop project, but with 510km of new roads proposed it had a clear emphasis on freeways. Much of the plan went undelivered, particularly in the inner city, though some land reservations were set aside for future development. If the plan had come to full fruition, how different would the cityscape of Melbourne be today?

**LEGEND:**

- Highway
- Major Road
- Freeway

**FREEWAYS:**

1. COLLINGWOOD FWY City to Collingwood
