- Wildlife welfare

Comment

I am an extremely concerned citizen, voicing a dire need of urgent action to start looking after our NATIVE Australian animals. For far too long we have demonised our Kangaroos as pests, our dingoes as pests and a magnitude of other NATIVE animals have been wiped out due to human destruction. Laws need to be made for our wildlife to live in peace, protect them, stop murdering them to make money, stop the barbaric slaughter of our Kangaroos and Wallabys and say there is too many. Stop the lies, stop the propaganda, stop saying they are unable to sustain their numbers, they always have since the very beginning. Make laws to protect our NATIVE animals, make laws to ensure humans are held accountable for the cruelty they inflict on our NATIVE animals. Build green corridors, build overpasses and underpasses in high fatality areas where vehicles are concerned. Build virtual fencing, ban barbed wire fencing all together, ensure there are hefty fines and severe harsh consequences for illegal clearing of land. Farmers need to understand they have to live and lean how to use the land in conjunction with the wildlife, not wipe everything out and complain about all the feral animals around them. We must STOP using poisons as a way of eradicating feral animals, we must STOP using 1080, mixamatoxis and other toxic poisons, it's killing our Natives. Our oceans, rivers and other waterways need the same protection too, stop toxic waste from farms, factories and illegal dumping. Governments need to urgently demand harsher consequences for people caught doing these terrible acts. If people knew they would be dealt with, according to a harsher law, there would not be as much destruction, contamination, SLAUGHTERING or cruelty in this state or country. We would be able to look out and actually see animals in their natural habitat, not have to go to a zoo or sanctuary to see them.
