Comments: The implementation of a mineral sands mine in this area will be devastating. The Mitchell River NP is a beautiful and significant part of Victoria's history and heritage, and the Gippsland Lakes are one of the worlds great lake systems. Both are under extreme threat from this mine. Additionally, the area adjacent to the proposed mine is of extreme importance to the food production capacity of Victoria, and with a growing population must not be compromised by irresponsible mining practices. Furthermore, if there were to be mine, it should be Australian owned and operated, with the full benefits of the mine to be shared by all Australians. Don't sell us out, do the right thing. Do not allow this mine to be opened.
