Other attendees: Louise Baring.

Apologies

Annette Vickery

Meeting overview

Opening

The meeting was opened by the Chair who thanked members for viewing the youth justice site at Little River prior to the meeting, stating it was valuable to view the location. Chair encouraged members to show people where the site location is and perhaps organise a time to show local community members. Following the meeting, the Little River Community Information session will take place to gain interest in residents and/or business owners joining the Community Advisory Group.

Deputy Chair appointment

Barbara McCure has been appointed as Deputy Chair of the Community Advisory Group for one year. John Menegazzo will serve as Deputy Chair in the second year.

Terms of Reference

- Updated Terms of Reference which outlines the roles and responsibilities of Community Advisory Group members was discussed.
- Two Appendix were added to the Terms of Reference, including a Code of Conduct and Social Media and Media protocol to ensure all members are clear about their role and to cover areas such as social media.
- Question was raised on how decisions would be made on what information from community would be passed onto the Department of Justice and Regulation or discussed at meetings. It was decided that all concerns and/or information or questions

raised by community should be passed onto the group and the Department. The role of the group as a conduit for community to provide feedback to the project and the project to the community.

- Question on Appendix was raised by the Wyndham Council that they have a separate role to speak about the project through their social media, separate to what it is outlined in the draft media and social media protocols. It was agreed that the Appendix would be updated to reflect council's role and to ensure the Department of Justice and Regulation has visibility of their social media posts/commentary on the project.
- Question was raised about what evidence is used to inform the number to allocate for mental health beds in the facility and a concern that 12 mental health beds was not sufficient enough. Department of Justice and Regulation confirmed specialist mental health support will be available at the centre in addition to that which is available through the mental health bed allocation.

Update on the project

The Department of Justice and Regulation provided an update on key project activity, including:

Key appointments

- Appointment of lead architect (principal consultant) and the security consultant are in the final procurement stages. Both of these consultants will be involved in the design of the centre.
- Once finalised and the procurement process has been completed they will be invited to attend the Community Advisory Group to discuss the design principals they will be designing to. They will also be developing the masterplan for the site which will be shown to the Community Advisory Group once it has been documented.

Cultural heritage

- The cultural heritage process has commenced with the initial meeting with Wathaurung Aboriginal Corporation (WAC), trading as Wadawurrung, who are the Registered Aboriginal Party (RAP) for Wadawurrung country. The date for the complex assessment has been booked in for October 2017 over a five day period.
- It was noted that as part of the initial meeting that the discussions highlighted that components of the Avalon corridor are highly sensitive areas. Some older aerial images located by the States consultants, Biosis, indicated some potential rocky outcrops which will be investigated as part of the complex assessment.
- Details of the assessment will be presented to the Community Advisory Group for information.
- It was suggested presentations are done for the next Regional Aboriginal Justice Advisory Committee in the Western Metro Region and Barwon region to ensure they are briefed on the project.

Planning amendment

- Notification to surrounding residents (2km radius) will be sent informing them of the rezoning of land to special use zone. A copy of the planning documentation will be available to those that wish to see it.

- Members requested a copy of the residential letter drop for the Planning Scheme Amendment to be sent to them for information.

Youth Justice Facility Plan

- Work will commence on the Youth Justice Facility Plan which when finalised will contain the outcomes of the site surveys.
- It is anticipated that this document will be substantially complete by the end of this calendar year.

Environmental surveys

- Flora and fauna reviews are underway. The spiny rice flower is the first targeted survey to start and the tiles have been marked out for the legless lizard surveys that will take place later in the year.
- All surveys will be made available as part of the facilities development plan.
- A request will be made to the environmental consultant to present to the Community Advisory Group at a meeting later in the year.

Economic opportunities for City of Wyndham

- Economic opportunities for City of Wyndham were discussed and how the community can benefit from job opportunities available during construction etc. The Industry Capability Network process was explained and the Council reinforced that they are keen to ensure community and local businesses are aware of how they can register for the process.

Community Advisory Group representation

- Question was raised about experts being included on the Community Advisory Group to help inform community consultation and engagement where required on youth justice and the building of the new Youth Justice Centre. The Department of Justice and Regulation confirmed that when specialist expertise is required to help guide, inform or educate the Community Advisory Group, they will be made available to present to the Group and discuss any key matters. For example the Project Architect to explain the design principals for the centre, or any other representative if agreed.

Youth justice custodial services

Len Norman, Director of Custodial Services and Community Advisory Group member, presented on Victoria's youth justice custodial services.

The presentation outlined;

- Youth offending trends and data
- Culture, policies, practices and management at the Centres.

The presentation highlighted:

- Victorian youth justice system treats children and young people who are involved in the criminal justice system differently from adults.
- Youth Justice system is guided by legislation and policy to divert young people from entering or progressing further into the criminal justice system, to provide better rehabilitation of high risk offenders, and to deliver pre-release, transition and post-release support programs to reduce their risk of re-offending.

- Approach to minimise the number of young people being remanded by supporting them to remain in the community where appropriate, maintaining their important connections to family, education, health services and community networks.
- Education is embedded into youth justice centre, with the example of Parkville which provides an innovative and specialist curriculum which includes literacy and numeracy skills, sport, personal development, music, art and wellbeing instruction, along with vocational classes.

Discussion was had on the age of young people in youth justice custodial services and the range from 10 years to 25 years. It was noted that age was not a sole deciding factor to the placement of young people in a youth justice centre, factors such as vulnerability, maturity etc. would determine the appropriateness of their placement in a facility.

Key meeting outcomes

- The next Community Advisory Group meeting will be on 14 August in Werribee where future community engagement opportunities will be discussed.
- An expression of interest process will commence for representation from Little River.
- Community Advisory Group members to review and endorse the updated Terms of Reference.
