Good morning Greta,
Following my presentation yesterday, one of the Committee asked me if the Kingston EPR addressed my concerns.

On checking, I assume that was in LV1

The landscape and urban design plans must:

- include vegetation screening appropriate for visually impacted community spaces, including residential areas and public open spaces
 - include vegetation screening appropriate for visually impacted community spaces, including residential areas and public open spaces
- etc.

My reply is that does not address my concerns as it is not specific to my village and it does not necessarily provide sufficient depth of vegetation to design for PM2.5 mitigation, as per my request.

Could you please pass this on to the Committee.

Regards

Frank McGuire
