DUST

If the extraordinary mummification of the Bairnsdale cenotaph has occurred to stop any particle of dust from escaping and contaminating the air in Bairnsdale and therefore our citizens; what can we envisage on a drive to Glenaladale with the Proposed Mineral Sands project?

If the unconscionable proposal of 1675 hectares of Mineral Sand mine were to go ahead, will there be a similar mummification of the boundary fence to ensure “The most significant potential radiation problem is inhaled thorium mineral sands dust” is prevented?
(<http://earthsci.org/mineral/mindep/minsand/minsand.html#TOP>)

Everything but, according to the website.
