- Protection and conservation of wildlife and habitat
- Wildlife welfare

#### Comment

I have great concerns for the loss of habitat for wildlife , mainly through bush/tree removal for urban development. It is critical for Animal welfare that the Departments responsible for their survival , is totally focused on EVERY aspect of keeping wildlife survival a TOP PRIORITY. If you are sitting in a office making the tough decisions, please get out there into the bush and appreciate the beautiful world of the wildlife that is slowly diminishing from our lives.
