Comments: This plan should not be allowed to go ahead. The environmental effects would be disastrous and have an extremely bad effect on employment in the area. As an area that is currently recovering from the Black Summer, to follow through with the ludicrous concept of opening a mind would be cataclysmic on the the environment and the residents of the area. Personally, I am unable to comprehend how to government would allow such a disastrous project to go ahead. This will not create jobs, it will destroy them; along with our environment that we so desperately need to protect. Extremely important habitats will be destroyed and significant, unique cultural heritage sites will be lost forever. Can Victoria really afford to lose more Indigenous land after the felling of the Directions Tree this week?
