

YAN YEAN ROAD UPGRADE
STAGE 2

LAURIE STREET TO BANNONS LANE DESIGN UPDATE

We're upgrading Yan Yean Road to help you get home safer and sooner

As part of the Environment Effects Statement (EES) process, we've been working to improve the design for Stage 2 of the Yan Yean Road Upgrade.

Design progress

In April 2018 we presented a design that included a 2.5m wide centre median with safety barriers between Laurie Street and Bannons Lane.

Through the EES process, we've been refining the design to minimise the project's environmental impacts.

Our EES technical investigations revealed that the trees between Laurie Street and Bannons Lane are significant foraging trees for the endangered Swift Parrot. The investigations also found the presence of a federally protected plant species, the Matted Flax Lily.

Another important consideration for us is to provide safe access off Yan Yean Road for properties between Laurie Street and Bannons Lane.

We've received requests from the community to install a service road in this area. Due to the limited space available, we're investigating if it's possible to build a service road that can service all properties and provide safe access for caravans and trailers.

We're continuing to investigate and develop a design that balances safety and the environment.

We'll continue to engage with residents in this area and will present the new design for this section of the road as part of the EES documentation in August 2020.

What we heard

Residents and businesses have told us that:

- safe access is important to residents along this section of Yan Yean Road
- preserving the local flora and fauna is important to the community
- the look and feel of Yarrambat is important to local residents.
