

We dearly value the Environment, the Farmland. The Fauna, the Flora bordered by Geelong-Portarlington, Batman, Allens & Tower Roads.

We had already, vehemently opposed “the Amendment C327 OLIVE GROVE Portarlington”, through a Community Campaign in the past and successfully saved it from the greedy hands of Developers.

But unfortunately, the new Council, supposedly made of “young & old Environmentally & Eco friendly counsellors have not adhered wholeheartedly to their “beliefs ? or “declarations ?”and have chosen to disregarded the Will, Aspiration & Efforts of the Community.

We really need, in our dangerous & uncertain times, responsible, ethical , wise & honest people at the Helm, in Power, who understand that once a Community has passionately fought very hard to save the “Olive Farm”, and other areas around on the Bellarine Peninsula, that decision must be respected for the sake of not only the present inhabitants, but for the Future Generations, children, grandchildren & great grandchildren.

What we really need & demand with all the Love & Passion in our Hearts, Minds & Souls is the Recognition by the Council & other relevant Authorities, that we are experiencing a dangerous Ecological Crisis, Climate change worldwide, droughts, Fires that is affecting not only Us as Humans, but also the non-Human world around us

In Portarlington, right now, Tower Road and its surroundings are being affected by an increased traffic from dawn to very late at night, due to so much development, that all the side roads and Tower Road Traffic has been heavily & at times, dangerously affected, let alone the Calm & Peacefulness of the Area.

We need, at the local, regional & national Level Men & Women with “Visionary Power, Courage, to save not only Portarlington, its already green & Saved Spaces, its Unique & magnificent Environment, Respecting & Acknowledging the “First People of this Precious Land the Traditional Owners of the WADAWURRUNG LAND & WATERS.

We can progress towards a great Future not only for all Australians but the whole of Humanity!

We all have a choice & should not be afraid of difficult challenges, taking positive actions, and Help to save not only our Environment, but also the Planet & SHOW THE WILL to do so!

Let us UNITE in this CHALLENGE, knowing that not only we can save our own ENVIRONMENT but also the WHOLE PLANET.

MAY GOD BLESS US ALL
