Comments: While I understand the need for “progress”, I question the decision to go with this option for the NEL. The environmental issues are a great concern, as this area Bulleen/Nth Balwyn have always enjoyed lovely recreational open spaces, which will be severely compromised. I am also concerned about the air and noise pollution that will affect the whole area & will mean that the school children in the area will be exposed to much higher levels of toxic exhaust fumes (with a tunnel exit directly opposite at least 2 schools) Disclaimer: the EES documentation was far too large for any person to read, therefore, my submission is based on what I was able to access, read and my personal experience. I am not liable for any information or statements I make within this submission. Disclaimer 2: My family will be having medical check ups prior to works on NEL starting and we will be taking air and pollution readings in our area as we’re concerned about the health effects that works on this project will have.
