Attachment 3:

Comments: This mine should not happen. It is disrespectful to the Gunaikurnai people and the thousands and thousands of years of history in the area. It is going to rob farmers of jobs not to mention water and land that is perfect for producing amazing world class food. It will destroy towns and tourism. The company proposing the mine has no experience and the potential damages to the environment could be disastrous and expensive. The future of our region isn't worth sacrificing for this mine.
