**Comments:** I have lived most of my life in the Bairnsdale area. My children are growing up in the area now. Kalbar and their mining operation will endanger their health, their homes, their future jobs and their recreation pursuits. The dust will travel into our water supply. Their trucks will clog our roads. And the run off from their mines will destroy our essential industries of vegetable growing and tourism. Both my husband and myself work in industries that rely on tourism and people to populate the area. We are terrified it will destroy everything we have worked hard for. The amount of jobs it will destroy versus the amount it will bring to the area is disproportionate. No KALBAR. No MINE.
