Comments: As a citizen of the Lakes Entrance area and as a retired teacher and lover of our children and their health I am asking that the mine does not get government approval to go ahead because of its proximity to homes and agricultural land that is an important part of Victoria's food supply, but I particularly ask on behalf of our children because I have seen the map of the prevailing winds that would spread the dust directly over a very important cluster of schools. I also worry about the impact on the waterways and Lakes if there was a flood event as the one we had 10 years ago. I would ask the government if the wealth accumulation of a handful of owners is more important than the health and wellbeing of your citizens and of the Ramsar protected Lakes?
