

To whom it may concern,

I write in response to the review of further information supplied by Yumbah Aquaculture - Reference Number 1003316. I have read through all of the documentation supplied and I do not believe it adequately addresses any concerns of noise; excess road or site noise. I own a property at [REDACTED] and are extremely concerned about the noise effecting my piece of paradise. I am concerned that although there is research in place in regard to the effect on water quality, this facility will be the largest of it's size in the current area so the actual outcome will be difficult to predict. The sheer size of the pipes that will be located on Dutton Way beach will be intrusive and ugly. I believe that the concerns of effect to sea life have not been addressed effectively and by a biased report. I do not believe that the site will be able to contain the dust and smell in high winds.

Avoiding taking this development personal is very hard as I feel very passionate about the beauty that is Dutton Way and do not believe that this location is at all suitable.

Thank you for your consideration

[REDACTED]
