Comments: Yarra Valley Country Club: I object to the inclusion of residential uses on this property. The whole of the Yarra Valley Country Club property should be acquired by the government and only used for public purposes such as public open space, recreation (so long as it is accessible to the public at all times), with cultural activities as well. This is far too significant a property, with river frontage, positioned in the middle of the river valley, for the incursion of residential use to be permitted. The proposal for this site is at odds with all the other proposals for Key Sites. This will then leave the Sonoco site sticking out like a sore thumb. It should also be acquired for public open space. In support of my objection, look at the effect the incursion of the Veneto Club has had on access the the river area, and how the residential area on the rise north of Bolin Bolin Billabong restricts that section of river - for no good purpose. Recommend that the whole of the Yarra Valley Country Club site and the Sonoco site be acquired by the government and only public uses be permitted. Do not allow residential or other private uses.
