**Comments:** The 8 sustainability goals are fantastic and critical for a sustainable new area of development. My concern is how they will truly be accomplished and achieved. The vision is great but how are the strategies/objectives accomplished? For example strategy 1.1.1 of Sustainability goal 1 is to 'seek to extend the tram network... etc'; how does the tram network get extended? What assurances this will be achieved? If there is a change in state government or city government for that matter, do these goals remain and how are they met? Thank you.
