Comments: Bulleen Art and Garden is so much more than just a nursery. It provides a real focus to activities around gardening, landscape design, sustainability and related educational activities as well as being an important venue for local artists to exhibit and sell their work. Family members of all ages have used and enjoyed the services provided and the loss of this local business will be keenly felt. I urge the State Government to seriously reconsider the design of the Mannigham interchange to accomodate the continued presence of Bulleen Art and Garden in its current location. It this is not possible then it would be great to see an alternative location found so that they can continue their great work.
