Comments: I write to oppose the mine and urge the government to look beyond financial growth to the destruction and future devastation it will bring to our local regional area. East Gippsland is heralded for its beauty and agricultural produce. Put more energy into farming, growing food and tourism to appreciate our local area for the treasure it is. One mine cutting away the land is just the beginning, once we have one mine when will it stop? It will destroy the farming land which provides all of Australia with fresh produce. The dust and chemicals used in mining will fill the sky and land. The flats where the mine is proposed are extremely windy and the dust will be carried for kilometres. Use our precious resources for the future not for financial gain and to support mega companies who do not have the future and our local community in their best interests.
