

Dear Sir/Madam,

I am writing in regard to Yumbah Nyamat Application number 1003316 planning permit application number P18147.

My reasons for objection to Yumbah's response to the original submissions are as follows:

**AIR QUALITY:**

**DUST:** Yumbah have given no explanation as to how the dust can be contained in a certain area so as not to effect precious

drinking water. During construcion stage the air will be very much dust polluted.

**ODOUR:** No explanation as to how the removal of smelly sludge from the settling ponds will be managed.

**VISUAL IMPACT:**

**SOLAR PANELS:** No explantion how Yumbah will screen out the glare of solar panels to residents living on the ridge/residents at

low levels will experience glare as well.

**MARINE LIFE - WHALES:** We still don't know the affect to the Southern Right Whales that frequent Dutton Way and give birth!!!

**MAINTAINING AMENITY WITHIN THE RURAL LIVING ZONE:**

How do we continue to enjoy the peaceful rural view that may be taken away from so many residents? Instead we will be impacted with..

**POLLUTION** by sound, odour, solar panel glare, visual pollution, traffic, dust. This is not an isolated area..(Yumbah have quoted) "Yumbah has carefully sited its farms in isolated areas"..

Loss of Amenity.

**SUMMARY:** NO FOR DUTTON WAY ABALONE FARM PROPOSAL, find another location.
