Comments: Dear Inquiry Board Members, I object to the proposed mineral sands mine in the Gippsland area above the environmentally sensitive and highly productive agricultural area of Mitchell River food growing (employing 2000 people) district. Degradation of water, soil, air, and living amenity of local farmers and residents would be grossly affected and affected for decades. Tourist visitation to the scenic area would cease and arable agricultural land be destroyed. This is an area where locals in the majority do not want this mine (for the above reasons) so I object to this proposal in its entirety as it is all fronts unsuitable for this region. thank you. David Metzenthén.
