Comments: My family originate from the Bairnsdale and Lindenow region. It is a precious environment that would be put at risk by the short term benefits that mining offers. My family and friends would be impacted by the detrimental effects of mining as they still farm and live in the area. My greatest fear is the potential for damage to the precious environment in the region that is already at risk. We also owe it to the indigenous people of the region to protect their sacred heritage. Please don't mine this beautiful region.
