

Submission re Wildlife Act

1. I can never understand how introduced animals that cause major damage to habitat can be classed as protected wildlife. Deer should be considered a pest and culled and rigorously managed.
2. DELWP is a poor regulator of the Act. Enforcement needs to be strengthened or even appoint an independent overseer or regulator.
3. I cannot understand why logging native forest is exempt from all sorts of wildlife protection schemes. On what basis? It smacks of corruption.
4. I like the idea some have suggested of protection overlays in planning schemes for wildlife habitat protection.
