Comments: I wish to protest that many residents have purchased property in the apartment towers of 92-100 Lorimer Street and 110 Lorimer Street on election promises of the government that a tram bridge would not be built to cross the Yarra through Point Park at the extension of Collins Street. This Election Promise appears to have been broken in that all drawings shown in the Fisherman's Bend Vision documentation show the proposed Tram bridge. I note none of the drawings in the vision depict Point Park as a green shaded area of parkland that is currently in existence, which is grossly miss-leading at best. None of the drawings that depict proposed bridges for Bicycles and Trams depict a height of such a proposed bridge, so I would like information regarding this important issue. The bridges proposed will render access to the Yarra's Edge Marina impossible for the vast majority of motor boat owners and all yacht owners, many of whom are additional rate payers to the city of Melbourne who hold long term leases to moorings in the marina. I find this removal of access to Port Phillip Bay, Victoria Harbour and the lower Yarra docklands completely unacceptable when alternatives for Tram access and Bicycle access to Fisherman's bend exist and have been supported by existing residents, rate payers and Politicians in State and local government previously. However Places Victoria persist with depicting these options as their preferred option. I submit these proposed bridges blocking 24/7 access to the Yarra's Edge Marina should be abandoned permanently for solutions that will not disrupt current rate payers and residents. I would appreciate a response to my submission and request for information of the height of the proposed bridges from high tide water level. Thanks
David Landgren
