Comments: I am the owner of a local landscape gardening business and I have been a customer of BAAG since 2002. This business is integral to my operations. No other business in the vicinity stocks the same range of products or is able to provide the kind of services I need. If this business is shut down it will adversely affect my operations and I will be forced to find new suppliers in outer Melbourne. This will increase the time it takes to source my materials and add to the cost of providing my services to around 100 existing clients in Balwyn, Kew, Alphington, Preston,, Lower Plant, Eltham and all the suburbs in between. I know as a long term resident of the area that the impact would be widely felt across the community.
