Dear Ms D'Abbs,

West Gate Tunnel Project EES – acoustic model

We refer to your letter to the Western Distributor Authority of 18 July concerning access to the noise model used in the preparation of Technical report H *Surface noise and vibration impact assessment*.

We are instructed that our client can make this available to you for providing to your expert acoustic witness, on the basis that the model is not provided to any other person and that all files containing the model are deleted at the conclusion of the public hearing.

On the assumption that this is acceptable, we will shortly send you an email with the relevant files containing the noise model.

Please let us know if you have any queries.

Yours sincerely
