Fingerboards Mineral Sands Project Inquiry and Advisory
Committee - EES

729

Request to be heard?: No

Full Name: Rachel Morgan

Organisation:

Affected property:

Attachment 1:

Attachment 2:

Attachment 3:

Comments: The proposal to mine so close to our river and lakes system is stupidity and risks so many beautiful and unique elements to the area. It risks the health of our community and our animals. It risks the future of our Farming and vegetable growing industry and jobs. It risks permanent damage to our eco systems, water ways and Gippsland lakes. The proposed use of water consumption for the mine is beyond sensible and rational. I'm pleading that you do not let this mine go ahead and protect our region and it's future. Rachel Morgan
