Comments: I am opposed to this bridge because of the changes it will create at Yarra's Edge to the larger yachts and launches. A lifestyle was promoted in the development of the towers and now despite saying that the bridge would not be built , this government just goes ahead and reinstates the build of it. Have you really looked at every option available before swinging back onto this course of action? People bought berths because of the convenience of having their yacht moored at the bottom of their building. The current proposal will turn the marina into a facility only able to be utilised by certain sized vessels. I am also not convinced that all options have been explored such as under the river or another tier of travel under the Bolte Bridge. You are a government that doesn't keep its word and I can see that this decision will cost you some very well connected support.
