#### Comment

Having worked in Statutory Planning years ago I know first hand that habitat destruction under the guise of offsets or 'Net Gain' have a large impact on wildlife. Everything needs its habitat. This NV scheme is not policed. In my time there, many of the statutory requirements were not completed and no penalties were enforced either. This Net Loss I am certain continues. Habitat loss is the key driver behind species decline and a key threatening process. It is death by stealth for our wildlife.
