Comments: All, I would like to raise up my concern on the tram bridge which go across to the point park. first of all, it kills the green area that we hardly have in the near by, kids got no spaces to run around, it is dangerous for the kids to play outside with the tram there near the playground. moreover, the tram track alignment will require an angel to turn after landing from the bridge. therefore it will create a lot of noises, it will damage the area dramatically. there are other options to push the bridge further down (to the west) which may benefit more residents or locals as well as reducing the impact on the existing development. Thank you. Derek
